SUMMARY

For over 14 years, I have been working in agile product development. In my roles as a Product Designer and Design Thinking Coach, I focus on empowering interdisciplinary teams, building confidence, and resolving blockers. With my background in UX and my technical understanding, I bridge the gap between stakeholders. My goal is to break down silos, optimize processes, and increase efficiency.

EXPERIENCE

04.2025 - today

Senior Product Designer & Design Thinking Coach / Interim Delivery Manager **B.E.G. GmbH**

- Leading the development and market launch of an IoT system for building automation (Devices, Gateway, Cloud, Web).
- Responsible for roadmap, prioritization, and release planning.
- Acting as an interface between development, management, and business departments.
- Requirements analysis, conception, and design of new processes and features.

11.2021 - 03.2025

Senior UX Designer / Scrum Master **grandcentrix (formerly a Vodafone subsidiary)**

- Conception and moderation of workshops within discovery sprints and pitches.
- Conception and design of cross-platform applications (Mobile & Desktop).
- Consulting on holistic UX strategies during sales activities.
- Moderating Scrum events and training teams on agile theory.

10.2018 - 10.2021

UX Designer / Product Owner **REWE Systems (today "REWE digital")**

- Conception & design of complex enterprise applications using Design Thinking & Service Design methods such as Journey Mapping and Service Blueprints.
- Contributing to the agile transformation and establishing a UX culture by leading targeted training sessions and creating internal knowledge formats (Unconferences & Meetups).
- Product Owner for the design system "Wicket".

10.2017 - 09.2018

Product Manager **CHECK24 Mobilfunk**

- End-to-end UX and conversion rate optimization by continuously developing all touchpoints of the customer journey.
- Responsibility for roadmap & backlog prioritization.
- Initiating and supervising UX tests, online rapid tests, and A/B tests.
- Tracking and analyzing KPIs with subsequent performance reporting.

12.2015 - 09.2017

Junior Product Manager **CHECK24 Mobilfunk**

- See responsibilities under "Product Manager @ CHECK24 Mobilfunk".

05.2015 - 11.2015

UX Research Manager

phaydon | research+consulting

- Cross-industry UX testing & stakeholder reporting.
- Conception, execution, and analysis of qualitative and quantitative user research studies (including in-depth interviews, usability lab tests, and UX evaluations).
- Synthesizing research data, deriving strategic recommendations, and presenting results to clients and stakeholders.

09.2013 - 04.2015

Junior Research Manager

phaydon | research+consulting

- See responsibilities under "UX Research Manager @ phaydon".

04.2012 - 08.2013

Intern, Research Volunteer

phaydon | research+consulting

- See responsibilities under "UX Research Manager @ phaydon".

EDUCATION

10.2008 - 04.2012

Degree in "Applied Cognitive and Media Science"

University of Duisburg-Essen (UDE) – Final Grade: 1.7 (Bachelor)

- Focus on Psychology and Computer Science

SKILLS

Agile Methods & Frameworks

Scrum • Kanban • Design Thinking • Service Design • Lean • Research Ops • Coaching

Requirements Engineering

Stakeholder Management • Workshopping • End-to-End System Understanding • Wireframing

Experience Design

User-Centered Thinking • User Research • UI Design • UX Strategy

Industry Knowledge

E-Commerce • Finance • Telecommunications • Energy • Construction Industry • Insurance

AI Knowledge

Prompt Engineering • AI-Driven Product Discovery • Conversational Interfaces • Generative AI Tools • AI-Assisted Research Synthesis

TOOLS

CERTIFICATES

AI in Requirements Engineering

2024 - SOPHIST GmbH

IREB Foundation Level

2022 - Anforderungsfabrik

AI Team Essentials

2020 - IBM

Design Thinking “Co-Creator”

2020 - IBM

LANGUAGES

German

2018 - Mobile Usability for Android & iOS

PROJECT LIST

IoT Platform for Building Automation (B.E.G. Luxonet)

- Development of an IoT system for building automation (Devices, Gateway, Cloud, Web).
- Responsible for requirements analysis, problem-solving, and solution design.
- Responsible for product ownership, roadmap, and delivery management of an interdisciplinary team.
- Implementation of an automated workflow (Make.com & Gemini) for AI-supported synthesis and distribution of user journey updates.

Connected Lighting Plattform (BEGA Connect)

- Customer-oriented development of an existing native Android and iOS app.
- Close collaboration with a strategically important client in the industrial sector.

Digitalization of Contract Processes (REWE DIGITAL)

- Requirements analysis for digitalizing contract processes between REWE and its suppliers.
- Conducting user interviews as well as service design and ideation workshops.

Further Development of Partner Portal (REWE DIGITAL)

- Building a portal for communication between REWE Group and REWE partner stores to simplify the processing of advertising brochure agreements.
- Conducting individual on-site interviews at the respective store locations.

Learning App for Apprentices (REWE DIGITAL)

- Optimization of the learning app for apprentices of the REWE Group with the goal of improving the user flow and developing new ideas for content.
- Conducting user interviews and Design Thinking workshops.

REWE Group Password Management (REWE DIGITAL)

- Use case analysis & service blueprinting for group-wide password management.
- Gathering current pain points and requirements.

Cancellation Service (CHECK24 Mobilfunk)

- Holistic conception of the automated cancellation service including complex mobile number portability.
- Conducting hidden experiments to gain insights into unclear processes.

Redesign Landing Page (CHECK24 Mobilfunk)

- Redesign of the mobile CHECK24 landing page for signing up for a mobile contract.
- Using Google Analytics to assess the current state and conducting A/B tests to compare different variants.

REWE Onlineshop (phaydon | research+consulting)

- Multi-year consulting as well as continuous validation ("rapid prototyping") and optimization of new core features for the B2C online shop.

Financial And Insurance Companies (phaydon | research+consulting)

- Evaluation and optimization of prototypes for various features in the online self-care area.

Telecommunications Provider (phaydon | research+consulting)

- Various studies on different topics, e.g., (mobile) online shop, self-care app, email client, online storage, setup processes, etc.
